INSTALLAION AND OPERATION MANUAL OF PROJECTION SCREEN

Suitable for fast-fold projection screen

[Attention]Please read this instruction before installing and using the projection screen, and keep this instruction for future reference.

Content
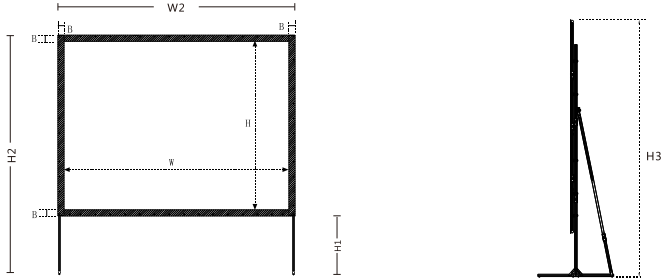

Sturdy, durable and user-friendly fast fold screen

1. Each part adopts aluminum frame and support which do not need to be disassembled. It is very strong and lightweight, easy to carry and transport, so it is the best allocation for performance locations and mobile exhibitions.
2. The frame and supporting leg are made of high strength, high precision hard aluminum alloy, which has been heat treated. It is quicker and easier to expand and fold, so that the frame and the supporting leg are more firm.
3. It is suitable for temporary sites, such as: exhibitions, concerts, banquets, large-scale business activities.

| Frame	Front screen (Customized)	Rear screen (Customized)
Screen bag	Left and right studdle	Locking screw

(P3)

(P4)
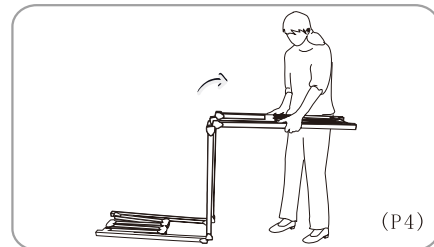

1.Take out< accessories 1> from the box, and open the active parts in sequence ,
unfold the frame on the floor(see P3-P4)

(P5)

"ka"

(P6)

2.Select a buckling part of the main frame, hold the square tubes on both sides with both hands, pull
the tubes to both sides. When you hear a click, it mean the buckle is fastened. Then fasten the other
three buckles in the same way, straighten each square tube, fully expanded the main frame. (see P5-
P6)

(P7)   (P8)

(P9)
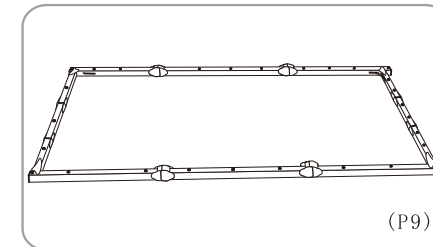

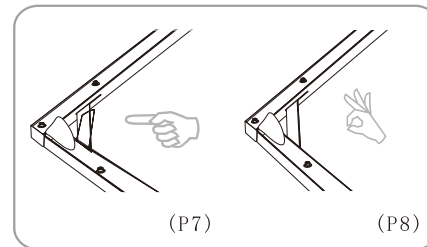

3.Select a corner of the main frame, and then press the internal junction to become ruler shaped,
completely open the corner. Finally, open the other three corners according to the same method, so
that the main frame is more stable.(see P7-P9)

(P10)

(P11)
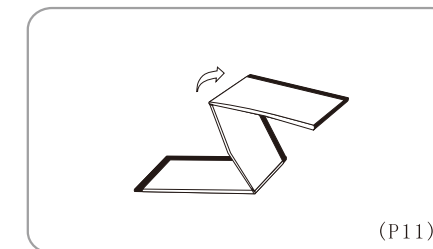

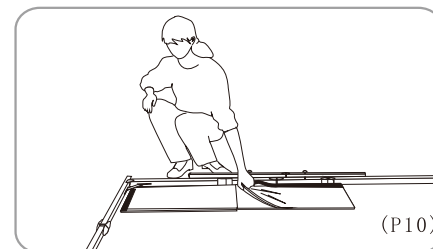

4.Take out the screen, put the folding screen on the frame corner, and then roll out the screen along the
frame.(see P10-P12)

(P12)

(P13)
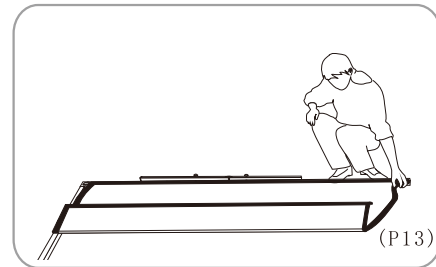

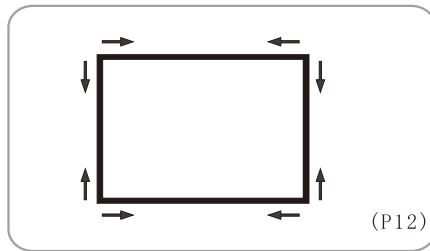

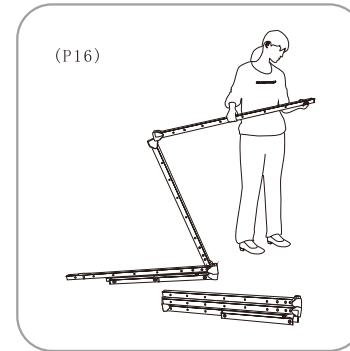

6.With the long side of the screen buckle corresponding to the long edge of the main frame, smooth the screen and fasten the buckles, then expand the screen, fasten the long side of the opposite, and then fasten the short side on the left and right.(see P12-P15)
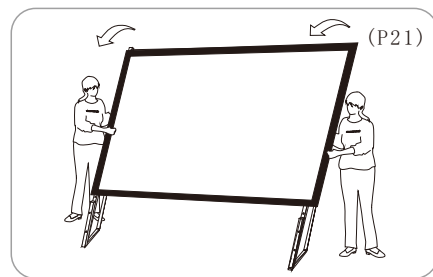

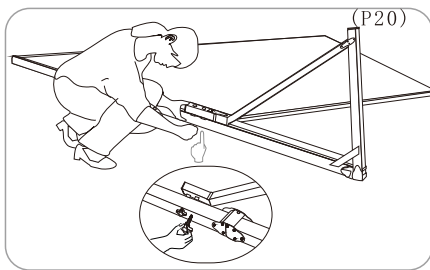

(P14)

(P15)

(P16)
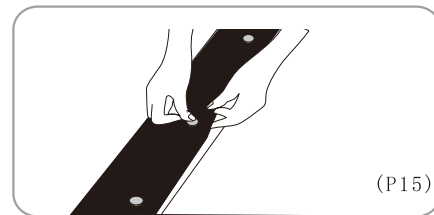

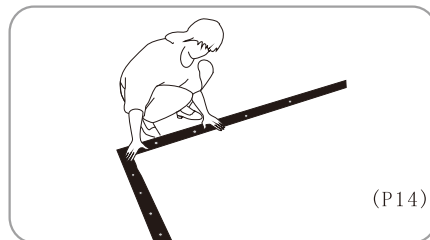

7. Take the left and right studdles, and refer to the second point of the installation method, open the active parts, then refer to the thirdpoint to completely open the inside and outside corners on the three studdles .(see P16)

(P17)
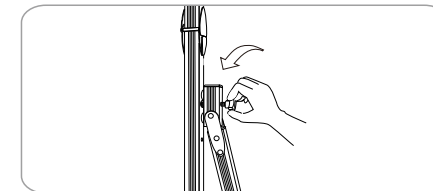

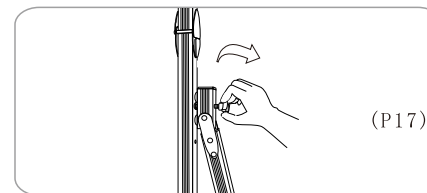

8.Unscrew the hand wheel nuts on the stubbles, pull the telescopic square tube to the right position.

(P20)

(P21)

9. It's best to install the main frame on the ground. Fold the external corners of the mounted studdle, which are near the short side of the main frame on the ground. And then choose the screw hole of the studdle and the main frame according to the desired height of the screen, screw the hand wheel screws, install the other studdle in the same way, then lifting the whole frame.
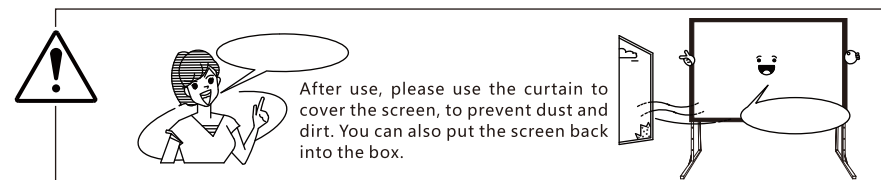

(P22)

(P23)
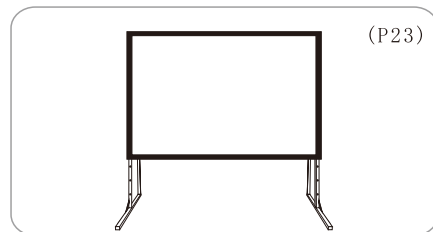

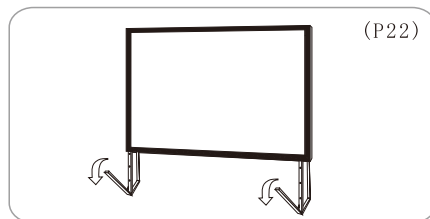

10.And then put the external corners down, so the screen can stand on the ground safely and stably. The installation is complete.(see P22-P23)

Recovery
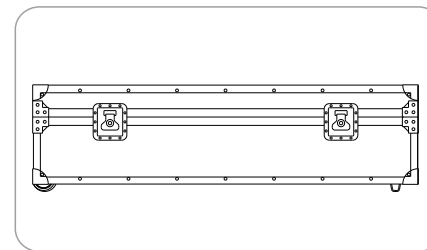

After use, please recover the screen according to the reverse order of installation and pack it into the box.

After use, please use the curtain to cover the screen, to prevent dust and dirt. You can also put the screen back into the box.
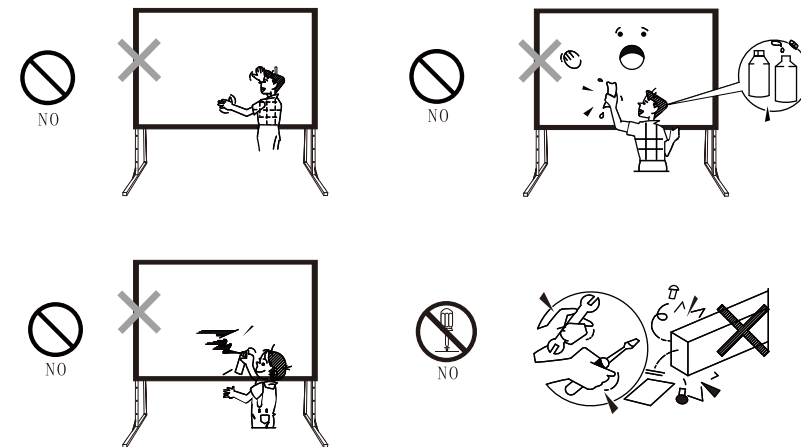

⚠️ Warning	Do not ignore the warning information. It is likely to cause personal injury or damage of products after wrong operation.	❗ Necessary	The screen must be installed in endurance places, or it may cause accidents or the screen may fall off.
🚫 No hanging	Forbidden to hang anything on the screen, or the frame may fall off.	⚠️ Warning	After use, please use the outer box to store the screen, to prevent dust and dirt.
🚫 No dismantling	Forbidden to dismantle anything. If the screen need to be repaired or adjusted, please contact our services department		

Note: Users are not allowed to remove and replace components! If there are faults, please contact our after-sales service department. The function and structure is subject to change without notice!
